# MEDLITE

# ✳ REVENUE CYCLE MANAGEMENT

Medlite Healthcare Solutions' RCM Services eligibility and benefits verification obtains all pertinent information required – not only coverage confirmation, but also specifies what kind of coverage the patient has (HMO, PPO, POS, etc..) what their deductible is, and how much has been applied, and helps generates complete payer information to bill the claims appropriately. Having all relevant E & V information takes each claim to the right step of getting it paid on time and reduce your administrative cost.

Through our long-term working relationships with physician partners and practice managers, we know their greatest challenges result from lack of integration between software applications; poorly designed template-based EMRs that slow physicians down, forcing them to use canned language; and technologies that under-deliver.

Our team understands federal regulations and technology are constantly changing, weighing your practice down and creating performance barriers. We help you break through them by using our innovative approach to leveraging fully integrated technology and workflow tools such as our RCM service that includes the following:

> Eligibilty and Verification
> Charge & Demo Entry
> EDI Services
> Payment/Cash Posting
> Patient & Payer Correspondence
> Denial Management
> Underpayment Recovery
> AR Follow-Up Management
> Credit Balance & Refunds
> Pre-Listing/Bad Debt Collections
> Pre/Soft Collections

## FREE PERFORMANCE ASSESSMENT

*Unhappy with your current EHR?*

*Frustrated with having to maintain multiple applications and processes that don't work together?*

*The Medlite team will analyze your practice's current condition, help you solidify your vision and goals and prescribe the workflow processes and technology platforms required to achieve them. The initial meeting typically requires 30 to 60 minutes at your office. Contact us now to schedule!*

---

We have screened, tested and implemented available technologies in the healthcare industry and developed a fully integrated comprehensive solution with guaranteed results:

> **EHR**
Our certified consultants will help you identify the EHR that fits your clinic needs. Our approach to implementing any health system is to remove redundancy, increase efficiency and workflow, allowing you to focus more of your time with your patients.

> **HEALTHCARE** Comprehensive Practice Management software, professional services and workflow processes, revenue cycle management, coding and billing, ICD10 training, financial services, Meaningful Use consulting and much more

> **SECURECELL®** HIPAA Compliant Text Messaging solution

> **TRANSCRIPTION** Medical transcription platform and services including Voice Recognition

> **DATA MIGRATION** Migration of patient historical information (PHI) from old EMR applications and paper charts into discrete, structured and mineable data within your new EMR/EHR. Over 1 million patients migrated!
